

## Engineering Schematic

# Groveport Road at Alum Creek Drive Interchange

The reconfiguration of Groveport Road at Alum Creek Drive involves the construction of a flyover bridge and bypass roadway that will include roundabouts located east and west of Alum Creek Drive; the widening of Alum Creek Drive immediately north and south of Groveport Road; the construction of storm sewers, curbing, gutters, driveway aprons, sidewalks, multiuse paths, median strips and guardrail; the installation of new street lighting, and traffic control signals and signage; and landscaping.
