Franklin County Engineer Cornell Robertson is seeking a Construction Inspector. The position starts at $24.13 per hour.

**Here is Some of What You'll Do:**
Under supervision from the Construction Engineer and guidance from the Design Construction Engineer, inspects construction projects to ensure contractor compliance with federal, county, and state specifications, plans and/or proposals (e.g., roadway, drainage, pavement, structure, electrical, traffic control, water line work, embankment, bridge decks, clearing and grubbing operations, painting of structural steel, guardrail installation), and inventories /or inspects county owned assets such as BMPs, culverts, pipe systems, etc. and reports those needing attention. Uses contract administration software to record construction activities and maintain project files. Reports progress with spreadsheets in Microsoft Excel and documents in Microsoft Word. Updates project schedule on Microsoft Outlook. Assists Design Construction Engineer to create as-built records in Bluebeam Revu. Maintains a project bill of material in Microsoft Excel. Collects and records material delivery tickets and certifications. Performs other duties as required (e.g., attends seminars for training; assists in checking plans and specifications in regard to location and quantity of materials used).

**Minimum Qualifications:**
Ability to calculate fractions, decimals and percentages; to read and write common vocabulary plus: 300 hours training in construction practices and procedures (or 3 months experience); or equivalent.
